Brillio (Dec 2019 - Present)

VMware (Senior Engineer)

- As a senior role in the project, I have helped the client with reskinning of Compass Application by crafting UI elements, integrating APIs and setting up fundamental code structure and system.

Verizon (Lead)

- As a lead in the project, I have made critical decisions in code structure, packages used, and have ensured delivering polished application to the users across the U.S.
- Responsibilities involved reviewing the code, maintaining git repo, accessibilities, SEO and tag usage metrics, refactoring and performance improvement.

Bristol Myers Squibb (AWS Lead)

- This engagement involved developing a set of Alexa Skills hosted on AWS for enterprise use.
- Conversation based UI, leveraging AWS services, OCR & Machine learning using Lex, Textract, S3, Dynamo DB, API gateway and Lambda.

Moonraft Innovation Lab

(Software Engineer, Nov 2018 - Nov 2019)

Vanguard Charitable

- Application was built using modern JavaScript, React, redux, immutableJs, and Ant Design.

AI Dosary Global

(UX Engineer, Jan 2017 - May 2018)

- Developed the company website using bootstrap, vanilla JavaScript and PHP.
- capturing business requirements to develop improve UX and designing solutions for business needs.

Hurreh Technologies

(AWS Solution Architect Trainer, May 2018- Present)
